

SURFACE REPAIR OF
WOOD, PLASTIC, METAL, TILES

PRODUCTS FOR PROFESSIONAL SURFACE REPAIR

WELCOME TO CLEHO

In an era of dwindling raw material resources, we have dedicated ourselves to the professional correction of surfaces (wood, plastics, metal, tiles). According to the motto: „what we do today will decide what the world will look like tomorrow“. (Marie from Ebner Eschenbach)

Repairing instead of throwing away - that is our concern.

Of course, we attach great importance to quality. Our waxes, varnishes and cleaners are all manufactured in Germany, and the quality of the raw materials is constantly monitored.

Are you a, carpenter, interior fitter, window fitter, floor and parquet layer, moving company, kitchen fitter, caretaker or hotel service or are you simply interested in the value-preserving repair of surfaces? Then you are right with us. Discover our products and innovations. If you have any questions or suggestions, please do not hesitate to contact us. Our colour palette already includes a wide range of colours from the wood, RAL and Renolit area. Individual colour designs are also possible. Contact us if this is interesting for you.

FILLING AND MODELLING PASTE

2-component Filler, especially for larger corner and edge damages on real wood and decorative surfaces as well as metal surfaces in interior areas. After hardening, the Filling and Modelling Paste can be finely treated with Sandpaper and e.g. the Metal Planer and varnished to match the colour. The spatula is pre-coloured in a light wood tone and can be coloured with the CleHo Touch Up Materials. Additional products for processing: Red Modeling Spatula (page 21), Metal Planer (page 21), Covering Lacquer (page 16)

Filling and Modeling Spatula

192g Can incl. 8g Hardener, 1 Modeling Spatula

1 Set

1 tube Hardener 10 g

Art.No.

1421012

170001

Each can of Filling and Modeling Spatula comes with an 8g tube of Hardener. The Hardener is also available individually in a 10g tube.

REX LITH

Extremely hard 2-component tube spatula. For the solid restoration of indented corners and edges. For reinserting broken fittings, sockets, screws, etc. Can be overpainted for colour matching after hardening. Additional products for processing: Red Modeling Spatula (page 21), Metal Planer (page 21), Plastic Films (page 21), Fixing Lacquer (page 16)

Rex-Lith Set

100ml tube** incl. 10g Hardener, 1 Modelling Spatula, 2 Transparent Plastic Films, 1 Squeezer

IF-139 PLUS

IF-139 PLUS

IF-139 PLUS is the optimal solution for production and workshop for removing defects in solid wood, veneer, wood-based materials, chipboard, MDF and plastics, ideal for shuttering boards and much more. Continuous use up to 10 hours is possible - during that time the IF -139 PLUS stays stable and processable when heated. In addition to the short melting phase and very short cooling time, the Filler offers a variety of further processing options. After it has been applied IF-139 PLUS can be further processed, e.g. painted, oiled or stained. It impresses with very good adhesion of coating systems. Can be painted with NC, 2K, water and UV Lacquers; accepts stains, waxes and oils.

IF-139 PLUS

available as a 30cm stick (unit of 10)
and as granules in a 20kg sack.

KNOT FILLER

For the quick filling of knotholes, cracks in wood, joints and drill holes. Provides a permanent flexible, elastic result. Recommended for interior use. On polyamide basis, Ø11mm / 25cm, melting point from 160 ° C. The PA Knot Filler is hard and at the same time elastic, does not sink. It impresses with its very good adhesion to wood, veneer and wood-based materials, and is non-toxic for users and the environment. Fast melting phases and short cooling times (only seconds) are just as much a part of the advantages as the diverse processing options afterwards (such as grinding, cutting, planing, milling).

To prevent sticking grooves between sealing tape and not yet cured thick layer glaze on windows and doors (ensures block resistance). **Complementary products for processing:** Cotton Cloth (S. 22)

Anti Stick Agent

1 Can 400 ml Art.No. 6941000

Multiple adjustable spray jet, precise application, smallest spray quantities

Easy handling, cartridge change within seconds

Repairing abrasions and chafing points

Repairing edge damage

Repairing damage in Powder coatings

Easy cleaning and colour change

Colouring of small parts

KING SPRAY DEVICE

In cooperation with the company Krautzberger, Heinrich König developed a top functional spray device named KING operating with resealable lacquer Cartridges. This system makes it possible to coat perfectly small surfaces and thus is ideal for use in the repair sector.

Clean working: Thanks to the Cartridge system, there is no longer a risk of splashing or leaking of the colour making it possible to even work cleanly on difficult to reach areas and overhead. **Flexible colour play:** The colour Cartridges can be exchanged during one working cycle as often as desired. Thus, there are no limits of colour variation for the user. The Cartridges are available in many colours. **Efficient and economical:** Being resealable, the cartridges make it possible to process small quantities. And the selective application and fine layers of paint result in very short drying times.

Easy to clean: A cleaning Cartridge ensures cleaning in seconds.

Application Video

King complete set

Hand-held spray device including hose with standard quick release coupling for compressor

- with nozzle unit Ø 0.3 mm

- 6521002 1x Cotton Cloth, à DIN A5

WINDOW PROFILES WINDOW FOILS CLEANING & CARE

NEW

AQUA SOFT-CLEANER

FOR THE PROFESSIONAL CLEANING OF MATT AND SUPER-MATT
FILM-COATED SURFACES AND PLASTIC WINDOW PROFILES

Extremely thorough, extremely gentle and recommended by leading film manufacturers: For cleaning film-coated surfaces, there is now the AQUA Soft-Cleaner from König is now available for cleaning film-coated surfaces. Thanks to its special formula, it shows its full capabilities especially on matt and super-matt films (such as Skai®mattex or RENOLIT PX Matt), without changing the gloss level of the film. The AQUA Soft-Cleaner also reliably cleans plastic window profiles (PVC white and colored) and painted, non-absorbent surfaces. Marking lines, labels, adhesive residues and residues of protective films can be removed just as effortlessly as bitumen, butyl and foreign body abrasion (e.g. rubber). The cleaner also removes emission deposits and building dirt without leaving any residue. And, of course, it does this both indoors and outdoors.

- ✓ CLEANS HIGHLY EFFECTIVE
- ✓ MAINTAINS THE GLOSS LEVEL
- ✓ SLOWLY DEPARTS
- ✓ NON-DISSOLVING WATER-BASED EMULSION
- ✓ MAINTAINS THE SURFACE
- ✓ ANTISTATIC
- ✓ PERFECT FOR INDUSTRIAL APPLICATION

TRAINING AND SEMINARS

Repair techniques play a central role to achieve that the work is durable and withstands even a critical look. As perfectly as colours, Fillers and tools are matched up, the repair remains a creative and professional manual work. For this reason we do not only convey knowledge in the professional application of our products but also train eye and dexterity of the user. For several years CleHo has been offering seminars for the wood and plastics processing industry in which theoretical and practical damage detection and repair is learned. The contents of the respective courses are suited to the different target groups and industries. The training courses can be held in-house or at our customers' premises. Further information and the current dates can be found at www.cleho.de/schulungen

FURNITURE/INTERIOR 1

Repairs of damages such as scratches, edge damage, pressure points, chafing points, open joints, broken pot hinges and similar are discussed and practiced, on the following surfaces: real wood stained and varnished (from matt to silk gloss), real wood oiled, waxed, natural and decorative surfaces (wood and plain).

ALL-IN-ONE

NEW

Suitable for facility management, hotel technology, gastronomy, sophisticated customer service of furniture stores, janitorial service, upscale carpentry/interior design service, repair service provider.

WINDOWS/FRONT DOOR

Repairs of damages such as scratches, damage, burglary damage, incorrect drilling, chafing points, miter grooves and similar are discussed and practical, on the following surfaces: thick-layer glaze and foil-laminated surfaces (windows & house doors), thin-layer glaze surfaces, white PVC surfaces and painted surfaces (e.g. PVC window profile).

FLOOR COVERINGS

Repairs of damages such as scratches, edge damage, pressure points, chafe marks and similar are discussed and practiced, on the following surfaces: real wood (parquet and stairs), flexible floor coverings such as vinyl as well as laminate, cork and linoleum.

TILES/NATURAL STONE

Repairs of damages such as deep scratches, edge damage, splintering, incorrect drilling and similar are discussed and practiced, on the following surfaces: granite, marble and limestone, artificial stone, tiles and porcelain stoneware.

METAL SURFACES

Repairs of damages such as scratches, holes, chafing, etc. are discussed and practiced, on the following surfaces: powder-coated surfaces, painted metal surfaces, brass fittings.

You can also book individual seminars titled to your needs with us - either in the training center in Niederdorfelden or at your location. If you have any questions about the seminars, please do not hesitate to contact us on +49 (0) 61 01. 65 50 53 or send us an email to seminare@cleho.de

AQUA FILLER

NEW COLOURS IN THE ASSORTMENT

Beech Brownish and RAL 7016 Anthracite Grey

A clever solution for **furniture, floors and stairs**: AQUA FILLER. Ideally suited for **fine cracks and open joints** in untreated/primed **real wood, laminate, MDF and even metal surfaces**. AQUA FILLER can also be used for shrinking corner joints in wooden windows. Handling is very simple: fill the damaged areas with excess and work flat with sandpaper or metal planer (Art.-No.: 452100) after curing. The filler is recommended for interior use (exterior use requires overpainting).

AQUA FILLER - A15500....-054
